**Neuroscience 2022
San Diego, CA, US
(Nov. 12th-16th, 2022)**

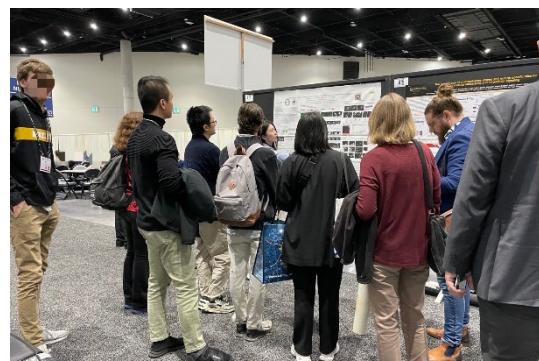

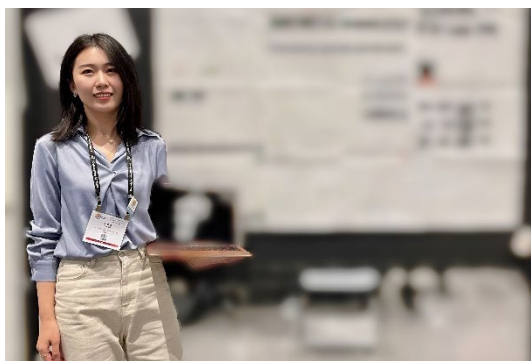

The annual meeting of the Society for Neuroscience (SfN), Neuroscience 2022, is organized by one of the biggest and leading organizations for neuroscience research and is a precious opportunity for neuroscience researchers to communicate and learn about the most cutting-edge knowledge.

The conference was taken place at the San Diego convention center, on the western coast of the US.

There were more than 30000 attendees from all over the world for this conference. Not only the presentations from Nobel Prize winners I attended, but I also, had a chance to listen to many great talks from researchers that are closely related to my research field as well as talks from different but important study topics. Moreover, I had the opportunity to directly talk to many brilliant researchers when they visit my poster and through those social events organized by the SfN community.

Visit a laboratory at UCLA

Los Angeles, CA, US

(Nov. 17th, 2022)

Besides, I could directly feel the different research vibes from the US, especially through a laboratory I visited at UCLA (The Black Lab). The inspiring and inclusive research environment in the UCLA laboratory made me feel welcomed and put a very delightful ending to my trip.
